MAINTENANCE AND CARE INSTRUCTIONS

Olympia products are designed and engineered under strict quality standards. Regular and proper care of our products will ensure years of trouble free service. To clean, simply wipe with a damp, soft cloth. Do not use abrasive or harsh cleaners as they may result in finish damage. Regularly remove the aerator and clean any debris inside it.

TROUBLE SHOOTING

A. If water leaks from the spout outlet:
   1. Shut off both hot and cold water supplies.
   2. Replace ceramic disc cartridge (F).

B. If no or little water from the spout:
   1. Ensure valves are fully opened.
   2. Check that supply lines are not kinked or crimped.
   3. Remove flow streamer (2), clean all internal debris and tighten flow streamer (2) back.

INSTALLATION AND MAINTENANCE

INSTRUCTIONS FOR OLYMPIA TWO HANDLE ROMAN TUB SET

THIS PRODUCT MEETS THE FOLLOWING STANDARDS: ASME A112.18.1 ANSI A117.1~ UPC / IAPMO LISTED / ADA COMPLIANT

PRODUCT NUMBERS

#P-1131B Valve Only
#P-1131T* Trim Only
#P-1131CS* Complete Valve & Trim Set
#P-1141T* Trim Only

OLYMPIA FAUCETS, INC. LIMITED LIFETIME WARRANTY *

Olympia Faucets, Inc. warrants its products to the original consumer purchaser to be free from defects in material and workmanship as long as the consumer purchaser owns it. Dated proof of purchase must accompany all warranty claims. PVD finishes carry a lifetime warranty in residential service. Olympia Faucets, Inc. will replace, free of charge, to the original consumer purchaser, any and all parts that prove defective under normal installation, use, and service. Damage as a result of misuse, abuse, accident, or improper installation, will consequentially void this warranty. Replacement parts can be obtained from your local dealer or directly from Olympia Faucets. Olympia Faucets, Inc. recommends using a certified plumber for all faucet installation and repair.

This warranty is limited to replacement of defective parts only. Incidental and consequential damages, labor charges, repair, or replacement costs are expressly excluded. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation may not apply to you. This warranty gives you specific legal rights, as you may have other rights of which vary from state to state. Installation or maintenance and cleaning must be in compliance with instructions furnished with every Olympia product. If you find a problem with your product, please immediately contact your nearest Olympia Faucets, Inc. dealer or sales representative.

* 2 year limited warranty on commercial and multi-family projects.
Thank you for purchasing this quality product. Olympia products are rigorously tested to provide long service under normal conditions. Prior to installation, familiarize yourself with this parts diagram. Make sure that you have all of the illustrated parts for your Olympia product before installation.

**INSTALLATION INSTRUCTIONS**

**Tools you will need:**
- Plumbers Putty
- Teflon Tape
- Pipe Wrench
- Flexible Supply Lines
- Basin Wrench
- Adjustable Wrench
- Soft Cloth

**ROUGH IN VALVE INSTALLATION:**

1. Determine where the finished surface of mounting deck will be. This measurement is very important. The maximum finished deck thickness is 1-1/8". For thicker deck installation stem extension (OP-490044) is available. This will extend deck thickness by 3/4". Refer to specification sheet for detailed installation drawing.
2. Drill three 1-1/8" diameter holes in the mounting deck.
3. Install hot and cold valves from underside of deck: The hot valve is marked with a red dot. Install the brass nut (D) then one SST washer and rubber gasket on valve body. Insert valve body through holes from underside of deck. Adjust the brass nut so that the tip of the stem (F) is 2-1/8" above the finished surface. Install one SST washer and then a brass nut onto top of valve body and tighten.

   Caution: The outlet of valves should be oriented towards the spout to ensure proper alignment.
4. Install quick connect shank (I) from the top of the deck: Screw a brass nut then one SST washer (J) from the bottom of the shank to the end of threads. Drop the quick connect shank (I) through the hole. Adjust the brass nut so that the top of quick connect shank after removing the test plug is 1-3/4" above the finished surface. Place one rubber gasket and then one SST washer on shank and secure the quick connect shank with a brass nut from underside of deck.
5. With rubber washer inside the T connector (K), connect to the quick connect shank (I). Attach flex SST spring hoses (L) to the outlet of valves and the inlet of T connector (K). Do not over-tighten.
6. Turn on water supplies and check all connections for leaks.
7. For installation that require mud and tile be installed later. Put cardboard sleeves on exposed valves and quick connect shank (I) for protection.

**TRIM INSTALLATION:**

1. Complete rough-in installation prior to installing finished trim. Remove cardboard sleeves if necessary.
2. Carefully unscrew test plug from quick connect shank (I).
3. Place spout escutcheon & gasket (6) over top of quick connect shank (I). Lubricate O-rings and insert spout (H) onto quick connect shank (I).
4. Make sure spout (H) and escutcheon (6) rest properly on finished surface. Secure spout by tightening set screw using properly sized Allen wrench (3). Insert a button in set screw access hole.
5. Put valve escutcheon (C) and gasket on valves ensure gasket is properly aligned.
6. Install lever handles (B1 or B2) on valves by using properly sized Allen wrench (A).
7. Remove flow streamer (2), Open valves fully and let the water flow for one minute. Check for leaks and tighten flow streamer (2) back.
